

Florence Park Nursing & Rehab is part of the Health Care Management Group™

Florence Park Nursing and Rehab Center is unlike any of the other skilled nursing facilities in Northern Kentucky. Our first and foremost concern is your loved one!

We individualize every aspect of their care from before they arrive to after they return home. There is no detail too small that we would not take into consideration. What makes Florence Park Nursing and Rehab Center so different and a cut above the rest? Our "family" environment, our individualized approach to customer service and meeting each person's medical, mental, and social needs in a dignified, respectful manner are a few reasons Florence Park is chosen by many satisfied customers.

We are committed to having the best staff-to-patient ratio, the best in qualified therapists and nurses, the most caring nursing assistance, as well as the hardest working support staff in the area. Florence Park builds its reputation on the quality, responsiveness, dependability, attentiveness, caring and letting our actions speak louder than words. Our "Open Door" philosophy allows residents and family members to have a voice, receive the attention desired and get results! Commitment is the defining line between good care and great care. Florence Park Nursing and Rehab is the one skilled facility committed to defining great care for each resident.

Greater Care for Greater Cincinnati

WE MAKE THE ROAD HOME SHORTER.

CARDIAC RECOVERY PROGRAM

The keys to our successful cardiac rehabilitation program are knowledge and desire. Our team of health care professionals brings the knowledge. You bring the desire to improve. As long as both are present, superior results can be achieved.

Cardiac rehabilitation is an essential part of our holistic approach to healing mind, body and spirit at Florence Park.

REHAB AFTER YOUR ORTHOPEDIC SURGERY

Your quick recovery is what we're known for. To achieve it, we integrate equipment from Accelerated Care Plus[®] (ACP) into our physical, occupational and speech therapies. Combining that with advanced treatments to reduce pain, we can start patients down the road to recovery with the most effective therapy interventions.

Our programs address:

Pain, Edema, Wounds, Stroke Recovery, Contractures, Arthritis, Post-acute Orthopedic, Neuromuscular Dysfunction, COPD and Fall Prevention.

**ACP is widely praised for their state of the art, safe, non-invasive and medication-free equipment—the choice for over 100 professional and collegiate sports teams, including NFL, NBA, MLB, NHL, NCAA, and NASCAR.*

ALZHEIMER'S DISEASE AND MEMORY CARE

Planning ahead by exploring living arrangements and care for your loved one with Alzheimer's and other related disorders is critical when it comes to making the right decision.

Our friendly nursing and activities associates receive on-going specialized training designed to meet the unique needs of Alzheimer's patients.

We are proud that our facility functions foremost as the resident's home, followed by serving as a gathering place for family and friends, and reflecting a welcoming atmosphere that is supportive of our staff and local communities.
